

Fuel Surcharge Adjustment Notice

Dear Valued Customer,

At **Dovre Specialty Foods** we strive to provide reliable service and consistent pricing while operating responsibly in a changing cost environment. One of the most variable costs affecting our operations continues to be fuel.

Over recent weeks, fuel prices in our region have experienced significant upward pressure due to broader global market conditions. While we are not a transportation company, fuel remains a meaningful input cost for us. This includes diesel purchased for our local delivery fleet, as well as fuel surcharges applied by third-party carriers who handle inbound freight and out-of-town deliveries on our behalf.

Despite our ongoing efforts to manage costs efficiently and absorb increases where possible, these recent changes have resulted in higher overall fuel-related expenses. As a result, we have adjusted our Fuel Surcharge, effective **May 1st, 2026** to better reflect current conditions.

Our Approach to Fuel Surcharges

- The Fuel Surcharge is intended solely to recover a portion of fuel-related cost increases.
- It is reviewed regularly and adjusted as market conditions change.
- When fuel prices stabilize or decline, we will reassess and reduce the surcharge accordingly.

We believe this approach ensures transparency, fairness, and long-term service sustainability, while continuing to deliver the high level of service you expect from us.

We appreciate your understanding and continued partnership. If you have questions regarding this adjustment, please contact your sales representative or our customer service team.

Sincerely,

The Dovre Specialty Foods Team
